# DESCRIPTION

Photo sharing platform (PSP) is about collecting photos from many different users during one specific private event.

Wedding? a birthday party? or a trip together with friends? With Photago you can create online collaborative photo albums and share them with friends and family. All invited user may upload, view and download photos to the album.

Our customer have attended many weddings and other big parties where there are a lot of people taking photos with their cameras or smart phones. The problem that many hosts have is to collect all these photos and sharing among the participants. The customer has met the same problem at many occasions and the question how to share always came up, therefore it was decided to start Photo Sharing Platform

## SECURITY, RIGHTS AND PRIVACY

- Each photographer keeps their rights. Photago will never use or sell your photos.
- Photos are stored on safe servers (Amazon EC2 and Amazon S3). We also create safe copies to make as much as possible that photos will not be destroyed by accident
- PSP albums are private. Only users with the right album ID/password or the direct link have access to an album

**THE BEST PART OF PSP IS THAT  
A USER DOESN'T HAVE TO MAKE  
AN ACCOUNT TO VIEW AND  
UPLOAD PHOTOS. THAT IS THE  
NUMBER ONE REASON I CHOSE IT  
TO USE FOR MY WEDDING AND IT  
IS GREAT**
